RATIONALE

The Religious and Moral Education syllabus is designed to contribute effectively to the development of children, not only in knowledge and skills, but in habits, understanding and character building. All of these qualities are essential for rich personal living and for being responsible citizens.

The teaching of Religious and Moral Education is therefore not concerned with passing examinations but more so with the inculcation of desirable attitudes in children towards themselves, others' life and towards God.

Attitudes and/ or moral values are established through many avenues. The class takes priority in this areas about equally so are the home and places of worship. Qualities which are held to be of value in the classroom, the use made of situations involving behaviour, the choice of the stories and the manner in which they are told, all combine to mould and build character.

Stories which describe unselfish or heroic behaviour are exciting to children and give meaning. In selecting stories the teacher must be guided not only by his/her ability to tell the story but also by the need to show that moral and spiritual attitudes are necessary to true living especially in the areas technological advancement.

Religious and Moral Education lends itself to the development of problem solving and critical thinking skills with the assistance of various types of material including technology. The content necessitates that students understand and analyze the activities so that meaningful attitudes and character building will result. These activities also allow for the development of social and emotional learning skills, so that students will understand how to solve their conflicts in an amicable way rather than resorting to violence.

Religious and Moral Education Syllabus supports the new initiatives of the Ministry of Education which stress:

- child centered approach to teaching and learning
- the development of critical thinking problem solving skills
- the development of interpersonal skills

- the development of positive work ethics and a sense of responsibility
- collaborative learning at all levels
- integration of technology as an instructional tool

GENERAL OBJECTIVES

To help children to show respect for authority and for others opinions, ideas and property.

To expose children to a knowledge of God.

1. To educate for Godly living
2. To teach pupils how to use God's word
3. To help to understand and appreciate their bodies as temples of the living God and to accept changes and differences of growth and development
4. To help pupils to develop positive attitudes and an awareness of their own potential and that of others.
5. To help children to understand, become aware of and develop desirable habits and good manners
6. To help children to understand and appreciate their community and the environment as a special part of God's Creation

FORMAT OF THE SYLLABUS

In addition to the syllabus for classes 1- 4 the document contains the following:

- Scope and sequence
- Attainment Targets
- Suggested activities
- Assessment objectives

The Scope and Sequence indicates the classes in which the topic is to be introduced and developed. The ■ indicates which class the topic/skill/concept should be introduced. The (√) indicates that the concept has to be developed and maintained.

The Attainment Targets indicate what each pupil should be able to achieve at the end of each school year.

Suggested activities included in the syllabus provide the opportunity for students to apply the concepts, skills and knowledge they have learnt. The proposed tasks meet both the individual needs of the pupils as well as facilitating, collaboration among pupils, teachers and parents.

Assessment, is a fundamental part of the teaching and learning process. However, in Religious and Moral Education it should not only measure what students know and can do but provide information about the development of attitudes and values. A variety of assessment tools should be used - portfolio assessment, checklists, journals, discussions and projects.

The Integration of Information Technology is an integral part of the Religious and Moral Education programme and teachers should be encouraged to use it to enhance their lessons.

It is expected that teachers will always strive to make the lesson real to the children so that they will learn about the gift of God in a creative way; the kinds of people they will meet in life and the type of communities people help to create.
